# DIALING DOWN URBAN HEAT USING HEALTHY SOILS

## Seminar | Site Tour | Discussion

Doesn't it seem that Perth is getting hotter! This is largely due to something called the urban heat island effect which is caused when we clear vegetation, develop and pave land. Fortunately there are quite a few simple things which we can do about it other than just turning up the aircon. Come to our World Soils Day event on 5th December to see and hear how community group Transition Town and it's volunteers are dialing down urban heat by transforming sandy and paved areas into cooler, healthier and more sustainable places to live.

**Join Us! Friday 5th December 2025**  
**from 2pm - 5pm\* (drinks and networking following)**

Floreat Athena Clubrooms,  
41 Britannia Road, Leederville  
(entrance off Egina Street)
